REGISTRATION REQUIRED – Email activities@earthcareonline.org or call (706) 278-3979 or visit [fall workshop](#).

"The Lord God took the man and put him in the Garden of Eden to work it and take care of it." (Genesis 2:15)

As Christians, we believe that we should responsibly care for those things over which we have been given dominion. One way to do this is by practicing sustainable energy use and building techniques in our homes, schools, churches, and businesses.

Our workshop leader Jeff Maxwell has been employed for many years with Home Depot and is an expert in the area of home energy use and energy efficient home construction and remodeling materials and techniques.

These topics and more will be covered in this workshop:

- How to do an energy audit of your home using a kilowatt tester
- What products at very low cost can you employ to save energy within your home
- The impact of phantom draw and its effects on energy
- What to look for when shopping for windows or insulated siding
- How local building practices can negatively impact energy use
- The difference between passive and non passive savings in relation to energy

Bring your questions about home energy use! Jeff will gladly answer questions from participants during and after the workshop.

Space is limited, so be sure to **register as soon as possible**. EarthCare members will be providing a pot-luck lunch. See schedule on page 2.

Workshop Schedule

10:00 – Meet and greet with pastries, juice, coffee, tea

10:30 – Workshop begins

After workshop – Pot-luck lunch provided by EarthCare members

Directions to Greenway Farm, 5051 Gann Store Road, Hixson TN 37343
